STEPS OF AN PROJECT IMPLEMENTATION

A – Preparation & Setup

- Finalize the project team (HR recruitment)
- Secure tools, resources, and logistics
- Define governance and communication channels
- Conduct risk assessment and prepare mitigation measures

B – Execution

- Assign and begin tasks according to the plan
- Coordinate the team and external partners
- Build, develop, and deliver the core output of the project
- Ensure activities are aligned with budget, timeline, and quality standards

C – Monitoring

- Track progress (follow-up)
- Manage risks and issues
- Communicate with stakeholders
- Collect data and measure performance indicators
- Conduct interim reviews for adjustments

D – Closure

- Evaluate the project and the goals achieved
- Finalize budgets and settle accounts
- Document lessons learned
- Plan for sustainability/exit strategy
- Disseminate results to stakeholders and the public
